

QLIKVIEW DEVELOPER

EnterpriseWorx is a Johannesburg-based IT company with areas of expertise including business intelligence, data management and application development, as well as an array of solutions tailored to address clients' specific needs.

Established in 2003, we've become specialists in using the power of technology and information to give organisations a competitive edge. To this end, we prioritise global best practices, agile methods, superior technology and the highest-calibre people and process optimisation, and we support all services with first-class IT project management and business analysis.

Job Description:

1. To implement enhancements, working from high level requirements specifications in line with business requirements (including enhancements to existing processes and procedures, development of new functionality, etc).
2. Assist in development and maintenance of back-end processes and establish the best method of extracting required data from the various master systems and Warehouse Databases.
3. Assist in the delivery of data from the source systems to the warehouse and the respective marts.
4. ETL processing – automation, scheduling, logging, monitoring and reporting.
5. Contribute towards development standards and guidelines.
6. Develop and maintain Qlikview models.
7. Quality assurance checks on all new project functionality.
8. Creation and maintenance of technical documentation.

Key Requirements:

1. Qlikview Developer/Designer with Insurance Background
2. At least 3 years solid experience in Qlikview development for dash boarding and formatted reporting.
3. Solid experience in SSIS, SSRS, SSAS & T-SQL and SQL Server 2005 and up.
4. Good working knowledge of Windows Server, and IIS.
5. Have worked with large quantities of raw data, large transaction volumes.

Experience in the some of the following would be a distinct advantage but is not essential:

1. SQL Developer/ Datawarehouse skills with MS T-SQL
2. ETL SSIS Skills
